Project Design Phase-I
Problem – Solution Fit Template

Date	01 November 2026
Team ID	
Project Name	Health360: Comprehensive Healthcare Risk & Disease Analysis
Maximum Marks	2 Marks

Problem – Solution Fit Template:

The Problem-Solution Fit simply means that you have found a problem with your customer and that the solution you have realized for it actually solves the customer's problem. It helps entrepreneurs, marketers and corporate innovators identify behavioral patterns and recognize what would work and why

Purpose:

- ❑ Solve complex problems in a way that fits the state of your customers.
- ❑ Succeed faster and increase your solution adoption by tapping into existing mediums and channels of behavior.
- ❑ Sharpen your communication and marketing strategy with the right triggers and messaging.
- ❑ Increase touch-points with your company by finding the right problem-behavior fit and building trust by solving frequent annoyances, or urgent or costly problems.
- ❑ **Understand the existing situation in order to improve it for your target group.**

Problem-Solution Fit Canvas for Health360:

1. CUSTOMER SEGMENT(S) Clinical risk officers, healthcare data analysts and public health researchers who work with patient records.	**6. CUSTOMER CONSTRAINTS** Large patient tables, no time for manual review, limited analytics skills, need for quick and trusted views.	**5. AVAILABLE SOLUTIONS** Manual review of records, spreadsheets and static reports. These are slow and hide patterns.
2. JOBS-TO-BE-DONE Find high-risk patients early, compare disease patterns across age, BMI and lifestyle, and plan preventive care.	**9. PROBLEM ROOT CAUSE** Many indicators sit in thousands of rows, so patterns are not visible without visualization.	**7. BEHAVIOUR** Users scan records by hand, ask analysts for reports and wait for summaries.
3. TRIGGERS TO ACT Rising chronic disease cases and the cost of late detection. EMOTIONS: Before: worried, frustrated. After: confident and in control.	**10. YOUR SOLUTION** An interactive Tableau dashboard and story: KPIs, 9 visualizations, filters for Age Group, BMI Category and Exercise Level.	**8. CHANNELS OF BEHAVIOUR** ONLINE: Tableau Public link, Flask web page. OFFLINE: team discussions and clinical meetings that use the findings.
