Ideation Phase
Empathize & Discover

Date	01 November 2026
Team ID	
Project Name	Health360: Comprehensive Healthcare Risk & Disease Analysis
Maximum Marks	4 Marks

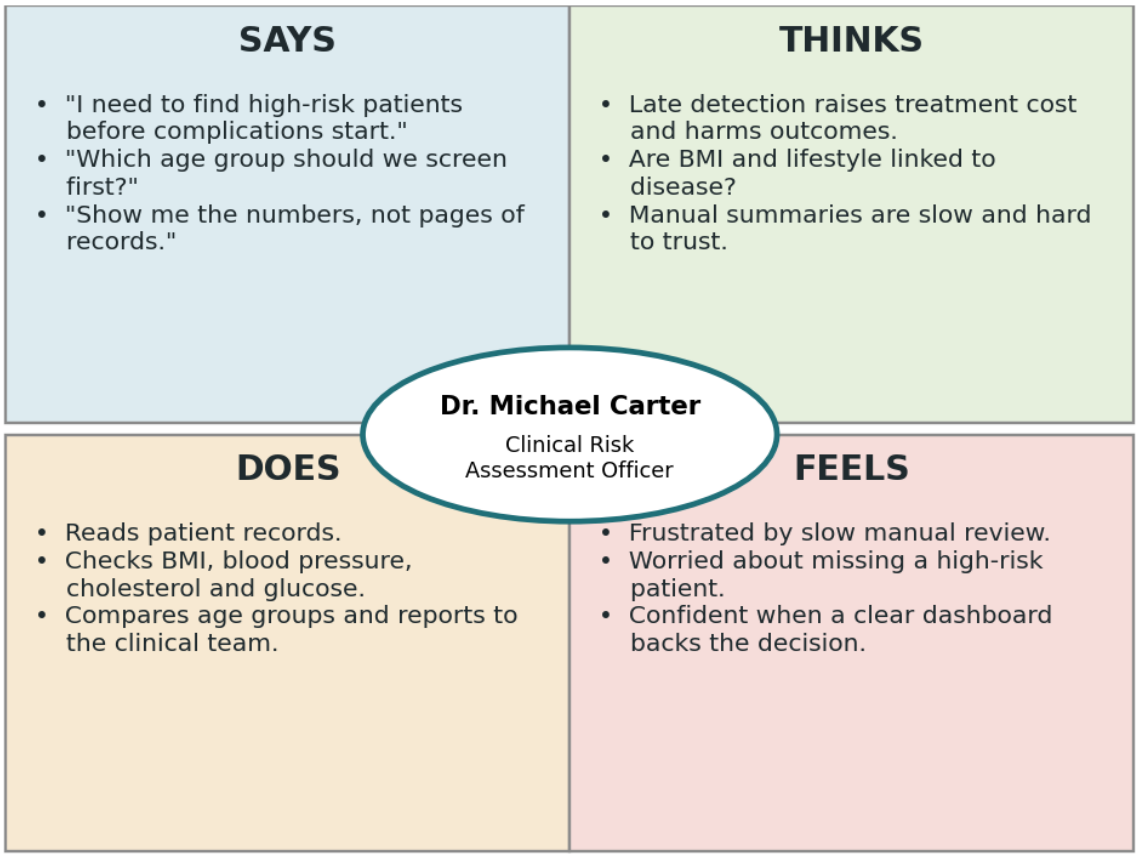

Empathy Map Canvas:

An empathy map is a simple, easy-to-digest visual that captures knowledge about a user's behaviours and attitudes.

It is a useful tool to helps teams better understand their users.
Creating an effective solution requires understanding the true problem and the person who is experiencing it. The exercise of creating the map helps participants consider things from the user's perspective along with his or her goals and challenges.

Empathy Map for Health360 (persona: Dr. Michael Carter, Clinical Risk Assessment Officer):

SAYS
"I need to find high-risk patients before complications start."
"Which age group should we screen first?"
"Show me the numbers, not pages of records."
THINKS
Late detection raises treatment cost and harms outcomes.
Are BMI and lifestyle linked to disease?
Manual summaries are slow and hard to trust.
Dr. Michael Carter
Clinical Risk Assessment Officer
DOES
Reads patient records.
Checks BMI, blood pressure, cholesterol and glucose.
Compares age groups and reports to the clinical team.
FEELS
Frustrated by slow manual review.
Worried about missing a high-risk patient.
Confident when a clear dashboard backs the decision.
